Makarious Luster

Code book for Player_data.csv

I like basketball because it is a sport that I have played my whole life. This talks data talks about who are the best players in the NBA.

I found my data in fivethirtyeight and that brought me to GitHub and I then downloaded the file and exported it to posit cloud

Jay Boice, Neil Paine and Nate Silver. "2022-23 NBA Predictions." *FiveThirtyEight*, 14 June 2023, projects.fivethirtyeight.com/2023-nba-predictions/.

Raptor_box_offense	This is what the offense looks like in the box score
Raptor_box_defense	This is what the defense looks like in the score
Raptor_box_total	This is how a player looks in the box score on offense and defense. The total points scored vs the total points scored against. Could be negative could be positive depending on the win or the lost.
